This report indicates why Division files in HQ must be searched in cases like JFK and MLK. While the FBI may well have considered that there were domestic intelligence aspect requiring investigation at the time of the assassination, since then it is apparent there were none turned up and there thus would appear to be no need to withhold. 89-43-2044.
No worksheet entry near here seems like to have been this "security" report. I recall none from past.
